👤 Summary

I am a Junior Frontend Developer with hands-on experience in JavaScript, TypeScript, React, Redux, ReactToolkit, HTML5 and CSS3. "Crafting Pixels and Pushing Limits!" That's how I describe my journey. For me, front-end development is not just about coding; it's an exciting challenge where creativity is blending with problem-solving to create seamless, user-friendly experiences.

💼 Project Experience

Filmoteka - Link

[React, Redux, Axios, CSS]

Application for choosing a movie. Successfully implemented asynchronous API calls with Redux for efficient state management, ensuring a smooth and user-friendly experience.

CountryInfo - Link

[React, Redux, TypeScript, Axios, CSS]

Building a comprehensive app that provides data such as flags, population, languages, and geography in a clear, Intuitive interface.

Portfolio- Link

[React, Redux, TypeScript, Axios, CSS]

Delivered a responsive, visually appealing section with smooth transitions, enhancing the overall user experience.
